Carol Stream, Ill. – Sept. 15, 2011 – *Constructech* magazine revealed the winners of its 2011 Vision Awards last evening, concluding the annual Technology Day conference. This year’s day of education, networking, and recognition was held at Drury Lane in Oakbrook Terrace, Ill.

The *Constructech* Vision Awards honor companies that have realized the advantages of applying innovative technologies to their everyday businesses as well as the technology enablers that have helped them achieve their goal.

Eligible companies were involved in residential, commercial, and heavy construction, and also included professionals in all trades, architectural and engineering firms, corporate owners, facility management companies, government agencies, and land developers.

“The Vision Awards certainly give us insight into some of the most cutting-edge implementations taking place in the construction industry,” says Mike Carrozzo, chief editor, *Constructech* magazine. “We have the chance to recognize innovation in so many sectors of the industry—homebuilding, specialty, heavy/highway, healthcare, education, to name a few. I hope we continue to see this caliber of innovation flooding every corner of the marketplace.”

The winners of the 2011 *Constructech* Vision Awards are:

Bentley Systems

“One topic that you will hear throughout the construction marketplace is the idea of collaboration. And, the winners of the Vision Awards epitomize this growing trend,” says Peggy Smedley, editorial director, *Constructech* magazine. “These companies have found success, and that can be seen throughout the organization, from increased ROI, to employee efficiency, and so much more. Congratulations to each of the winners, on both the success they have achieved, and their determination to let collaboration lead them to it.”
