

## CG VISIONS' BIM PIPELINE™ CAN NOW MOVE DESIGN AND OPTION DATA FROM CAD AND BIM SYSTEMS DIRECTLY TO BUILDERMT ESTIMATING

**Denver — June 23, 2015** — BuilderMT, the widely-acknowledged market share leader in workflow management solutions for mid-market home builders, now offers a new estimating capability through its integration with CG Visions.

Using CG Visions' BIM Pipeline™, BuilderMT users can now move design and option data from CAD and BIM systems directly into BuilderMT Estimating, even for home plans heavily customized in the options process.

CG Visions' BIM Pipeline™ uses model dimensions to translate a home builder's designs into the products the builder needs to build that home. Those products can then automatically appear in BuilderMT, where their data populates BuilderMT's purchasing system, creating accurate purchase orders in the process.

BuilderMT purchase orders are tied to real-time pricing, so BIM Pipeline / BuilderMT users can accurately determine the costs of any home, even if they are building it for the first time.

With CG Visions' BIM Pipeline, home builders can work entirely in digital design environments, through design programs like eTakeoff, PlanSwift, VisionREZ, Revit, AutoCAD and Vertex, saving time that used to go to redrawing plans or manually creating purchase orders to calculate costs.

Click here see a multi-media video and schedule a presentation about the product: <http://buildermt.com/design/>.

"Advances in CAD and BIM integration have taken great strides toward making the design process, the option selection process, and the purchasing process all one seamlessly integrated system," said Tom Gebes, BuilderMT's president. "Increasingly, all builders are production custom builders, and this integration helps them to ensure margins and profits."

### About BuilderMT

For the home building industry at large, BuilderMT (a MiTek company) provides highly-customizable workflow and building-process-management software that works in tandem with leading accounting systems and other wireless and jobsite productivity tools, such as CRM and warranty management. For 20 years, BuilderMT systems have been purchased by more than 1,000 home builders and cumulatively used as a desktop workflow tool by upwards of 10,000

home building professionals. BuilderMT is widely recognized as a leader in process-driven, best-building-practices for home builders, as well as customer service, warranty applications, online training and innovative wireless applications.
